Big Minstrel Show Coming November 27th

For you who have not yet seen the posters which are on display for the Minstrel show Friday Nov. 27th. Let me say there will be four big attractions. The first "Wanted a Singer", in this act Mr. Murphy in the person of Mr. Dawson advertises for singers. Several applications are received from such notables as Amos, Mr. Geo. Campbell, Ephraim, Mr. Geo. Orr, Sambo, J. D. Henderson, Eucalypt, Mr. Franklin Cool, Rastus, Mr. W. A. McIntyre, a coon waiter. These men form the end men in the big Minstrel show that follows. Mrs. Frank Caldwell is pianist. The Hill Billies are well known artists from the high school orchestra. The Mikado is a comic drama, the characters are all coons. Can you imagine the "Three Little Maids" from school weighing around 500 pounds and Kit-sha-an "Old Hot Coon Beauty" in the person of Mr. Fred Watts. Mrs. S. H. Bain is pianist. More will be said about the Mikado in next week's issue of the Chronicle. The main show is the Minstrel show with some forty voices singing in the choruses and with the end men above mentioned in will be some show.

W. I. Hears Interesting Address

The Champion Women's Institute met on Tuesday afternoon November 10th at the home of Mrs. R. I. Baker. After the regular business was transacted, an interesting address was given by Rev. Peter Dawson on the League of Nations. The League, said Mr. Dawson, was not altogether a product of the war, but rather a crisis of a long programme of development. Ever since the reformation an attempt has been made to harmonize the relations of men on a higher scale, so that peace could be brought about by mutual consent as it never could be by conquest and arms. Through the primary purpose of the League is to prevent war and the horrors connected with it, there are other departments such as with an expert at the head. The League is not sufficient in itself, but should have the prayers, sympathy and co-operation of the public mind. To make disarmament real and possible, we must have disarmament of mind, and much can be done in the school and community to create this.

The meeting then stood in silent tribute to the men who went to the front but did not return.

Following a discussion with regard to the skating rink being opened, a committee was appointed to interview the Village Council with an offer for assistance.

The auditors for the year appointed were Mrs. Alexander and Mrs. Hummel. It was decided to accept the offer of the Department of Agriculture for a demonstration of dry cleaning. Following the national anthem a very delicious lunch was served by Mesdames Ditto and Farries.

Closing By-Law Now in Effect

The Early Closing Bylaw which has been advertised in The Chronicle, was passed at the council meeting held last evening.

The Bylaw provides for the closing of stores for the selling of merchandise at 6:00 p.m. on Mondays, Tuesdays, Thursday and Friday, 1:00 p.m. on Wednesdays and not later than 11:30 p.m. on Saturdays, except during the months of August and September, and during the week in which a statutory or other holiday takes place.

This Bylaw will be effective on and after Monday November 16th next and the co-operation of everyone, both in town and country is requested in order to make this early closing movement a success.

Contribute To Army-Navy Fund

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of men of the merchant marine service, Champion citizens subscribed \$7.00 to this cause in a recent campaign here conducted by Fred Cook, organizer of the Alberta division. Any further contributions may be sent to V. J. Ward, Esq., secretary 2140, sixteenth street, west Calgary, or S. L. Miller, Esq. Treasurer, 515 Sanson Bld. Calgary. The sailor magazine, published quarterly, may be obtained by the payment of \$1.00 per annum in addition to your donation to our fund. The regular fee for the magazine is \$2.00 per annum.

Railway Depot Had Narrow Escape

J. M. Moffatt and Gordon McLean, returning from Lethbridge last Friday night, discovered the platform of the Calgary station to be on fire. With considerable damage to their clothes they succeeded in checking the blaze which would have destroyed the entire building had it not been so discovered.

H. E. Johnson Leaves for Okotoks

With the departure of H. E. Johnson for Okotoks another successful old timer is lost to the district. Mr. Johnson was one of the most successful farmers in the entire district from early days until his retirement a few years ago. In addition he was one of the strong men in Harmony municipal council for many years. Regret at his departure will be general among a wide circle of friends.

Bone meal, alfalfa and beef scrap for those hens will give you good returns, at Campbell's.

O E Hargreaves and son returned on Monday from Staveland where they have been visiting Mr. and Mrs. A. E. Shaw.

THURSDAY, Nov. 12, 1931

NOTES AND COMMENT

A wave of speculation in wheat has again developed throughout the west, and doubtless accounts in part for the rapid gains made in prices recently. It is possible some people will make money by going long on wheat under present conditions. The principal trouble seems to be that the western investor will never take his profits. If wheat goes up ten cents there is no reason on earth why it shouldn't go up twenty cents, from his point of view, so in the end he is bound to get caught.

The University of Alberta livestock entries at the Toronto Royal Show this year will consist of 13 head of cattle, made up of four shorthorns, six aberdeens, two Herefords and one crossbred. Of the group one junior yearling shorthorn is from the herd of Alex McDougall of Champion, Alberta. Among the Angus entries one junior yearling is from the well-known herd of Charles Richardson of Bowden, and another junior yearling is from the herd of Frost-on Shapere of Bashaw. In the Hereford classes one senior calf is contributed by Frank Collicut, of Crossfield. All the remaining members of the group are university bred stock. Included with the university shipment will be four head of breeding shorthorns from the herd of J. L. Walters of Clive, and two Aberdeen Angus from the San Henderson herd at Lacombe. The cars loaded at the university will go to Calgary, where they will meet ten other cars of Alberta livestock, including beef and dairy cattle.

Without creating any unusual stir preparations for a real show have been going on for some weeks, and the public, it is now announced will be entertained on Friday, Nov. 27th. While described as a Minstrel Show, the programme evidently has several variations from straight minstrel lines and promises a variety of features which should prove popular to the public. With J. M. Moffatt in charge of the musical end of the show and Rev. Peter Dawson handling the plays there should be no room for doubt as to a real night's entertainment being provided on November 27th.

While all statistics available point to a continued advance in the price of wheat, the opinion is freely expressed that recent advances have been too rapid and invite reaction, as export demand was checked.

"Hell's Angeles," the mightiest drama that the world has ever seen—a production that will go down in the history of motion pictures as an unmatched achievement.

One reason why fish are desirable food is that they contain such health-building elements as vitamins and iodine.

Friday November 27th will be "Away Down South" for Champion Community when the town will be infested with connoisseurs looking for coons from everyone in the district. Four big performances are in preparation and with Len Davis and his orchestra playing "Southern Melodies" between acts a big time will be had. Mr. J. M. Moffatt is director of music, the Rev. Peter Dawson in charge of dramatics. Get your tickets early and reserve that seat for "Bo, da" will be some show.

The experimental station at Swift Current is responsible for the statement that there is less moisture this fall than a year ago. The heavy rains early in the fall were not sufficient to overcome the dry condition of the land after two dry years. The situation here is very much the same and hopes will be general that this condition will be improved before freeze up or during the winter.

Here's a picture that will thrill old and young alike—it has the universal appeal of all great masterpieces..... "Hell's Angeles."

Approximately 53,800 barrels of the herring caught by Quebec fishermen in 1930 were used as bait.

WE SELL AND RECOMMEND
Wampole's Extract of Cod Liver
The Best Tonic for Coughs, Colds, Influenza and Grippe

IT IS better than ordinary cough medicines, for it reaches the seat of the trouble, relieves the cough and supplies continual treatment to build up the system to withstand future attacks. A splendid blood and body-building tonic for both young and old who take it regularly.

A Want Advt. Will Do It! With All Kinds of Job Printing

Our Best Thanks

To those who responded to our appeal for payments on subscription account. The amounts involved are small individually, but collectively become very important.

We still need the money very badly, so help us if you possibly can.

You Need a Local Paper

The district is small when it is considered as a newspaper field, necessitating practically unanimous support to make its publication possible. The only flaw in this respect is an inclination to forget payment of subscription dues. A fair start has been made towards remedying this, and if this movement continues until the Christmas holidays there will be little left to complain of.

Do It Now!

The Chronicle

Declares More Armed Men In World To-Day Than In 1914, Before Outbreak Of Great War

Arresting information on world armaments was given by Hon. Hugh Guthrie, Minister of Justice and head of the Canadian delegation to the 32nd assembly of the League of Nations. Twenty per cent. of the aggregate amount of revenues of nations in the world today goes on armaments, Mr. Guthrie declared to a combined meeting of the League of Nations Society and the Women's Canadian Club at Ottawa. After all the efforts of the past 12 years there were more armed men in the world today than there were in 1914 before the war. Expenditures were greater, he said, Mr. Guthrie, danger of war because of large armaments existed in 1914, what should be said of conditions today?

This condition was the reason for the coming disarmament conference to be held in Geneva next February, continued the Minister of Justice. Right thinking people felt that there was danger of war and that steps should be taken to remove this danger. If a start is made, he said, it could be made next February, much would have been accomplished. "But," said Mr. Guthrie, "I believe that success must precede disarmament." Europe.

The Minister of Justice spoke on the subject of "Progress of the League of Nations." Having returned from Geneva only a short time ago, he was familiar with proceedings at the 32nd assembly, and he outlined for his listeners what had been accomplished by the representatives of the 32 nations present. Disarmament, he said, had overshadowed all other subjects discussed. A draft agreement had been prepared for submission to the disarmament conference in February, and he considered it a model document.

Railway Board Ruling

A Surchage Is Set On Express Rates To United States. A surcharge amounting to 60 per cent. of the rate of exchange between Canadian and United States currency has been imposed upon the ordinary rates, by the Board of Railway Commissioners. The order becomes effective at once. This brings the rates on traffic to the United States, a surcharge having been placed on these several weeks.

Refusal of the United States express companies to accept payment in anything but United States funds was the reason for the imposition of the surcharge.

As To Names

Found That Mary Is The Favorite Among Women's Names In England. Careful statistics have been collected by a man in England as to names, from which it is realized that John is the favorite Christian name in that country, followed by Thomas, William, Richard and Robert. In that order, Mary is the favorite among women's names, and during the past hundred years sixty-eight girl babies out of every thousand have been christened Mary. Ellen, Sarah, Anne, Jane and Ellen come next among girls' names, or did so up to the date of the Great War.

Woman Reptile Expert Dead

Miss Joan B. Proctor, Curator of reptiles at the London Zoo, one of England's most distinguished zoologists, has died. Miss Proctor, who was 34, would have been the most dangerous reptiles with a fearlessness which astonished old-time menagerie people. Surgeons were amazed at the ease in which she would voluntarily open up the head of a cobra or a rattlesnake without displaying a sign of fear.

"Your husband a man of rare gifts?" asked the old school teacher. "He must be," replied the sweet bride. "He only gave me one present since I met him."

Weather Records Changed

White River, Ontario, Had Unusually Mild October. White River, Ontario, which often was page one prominence because of its winter habit of being the coldest spot in Canada, blossomed forth this year with weather records of a totally different kind. An average high temperature of about 40 degrees was recorded for October of this year compared with 40 a year ago, while the lowest mark to end of October was well above 40 with 10 degrees shown as the low at that time.

Plant life flourished under the mild weather, with tame strawberries being plucked during the month. Blueberry blossoms found in many places and dandelions numerous. The fourth crop of clover was being grown in farm fields. Hunters reported the woods full of insects, black flies and mosquitoes being nearly as numerous as in midsummer.

Automobiles Give Big Revenue

Registration and Gasoline Tax Help To Meet Recurring Needs. Revenue from motor vehicles, including registration and gasoline tax, totalled \$1,076,405 in 1930, an increase of \$1,745,100 or 43 per cent. over the previous year, according to preliminary report on highways and motor vehicles issued by the Ontario Government Bureau of Statistics. There was a decrease during the year under review of \$2,165,154, or 27 per cent. in registration fees, due largely to the decrease of the average fee in the province of Ontario. This was offset by an increase of \$5,010,207 or 20.9 per cent. in the receipts from gasoline tax over that of 1929, owing to the larger quantity of gasoline consumed.

By Annette

Winnipeg Newspaper Union. The dress is a Peter Pan collar. It may be made with long or short sleeves. The front and the back of the dress are gathered to square yokes. The full cut bloomers have elastic inserted through hems at the upper and lower edges. Style No. 300 is designed for sizes 2, 4 and 6 years. The 4-year size requires 2 1/2 yards of 36-inch contrasting. Printed dainty, tissue, gingham, cotton broadcloth, print, linen, tulle, chamois and many rayon fabrics are lovely for this practical bloomer dress. All patterns 22 cents in stamp or coin (coin preferred). Wrap can be carefully.

International Peace Garden

Turtle Mountain Site Has Been Selected By Committee

The International Peace gardens will be located in the Turtle Mountain site in Manitoba. The final selection of this area has been made by the international committee and is now approved by all American and Canadian bodies having the question of a site under consideration. The Turtle Mountain site is on the International Boundary, partly in Manitoba and partly in North Dakota. In September the National Association of Gardeners at their convention at Ashbury Park, N.J., approved the site, but final decision rested with the International Peace Garden Commission and the executives of the Canadian Association of Florists and Gardeners and the National Association of Gardeners.

Two sections of land are to be donated by the Manitoba Government and a similar area by the state of North Dakota. The plan calls for planting the garden with flowering plants, trees and shrubbery representative of both nations.

It is proposed to raise a fund of \$50,000 to maintain the garden in perpetuity as a token of the unbroken peace between Canada and the United States. While means of raising money are being sought, the international committee is considering a collection of small donations from school children in all parts of Canada and the United States.

Good Advice To Follow

Live Right and Whether Future Life Exists Does Not Matter

Relatively few people reach a state of mind which enables them to say with the late Thomas A. Edison, "If there is life hereafter, or if there is none, it does not matter." Most men today live either in an earnest hope or dire dread of immortality. Or, if they dissent from the general belief in life after death, find cold comfort in the prospect of annihilation.

Few of us are wise enough and strong enough to live as we believe life ought to be lived and then remain content to let the question of a future existence take care of itself. Few of us are able to keep before our minds an acute realization that talk, speculation, argument and desire are utterly impotent to change the fact about the existence or non-existence of immortality; and that the best we can do is to order our ways so that in the event of an awakening beyond death, we will be in a position to exist comfortably and happily hereafter.

Certainly there is nothing to be lost by a life of proper preparation for possible eventualities, and there may be much to be gained. And so, certainly, if the order of the universe contains no provision for reward or punishment, man there will be no regret, for we never will know that we labored in vain.

Unnecessary Rebuff

Upon reaching home, after his lengthy trip, Lindbergh was asked by a reporter, "How does it feel to be in the United States again?" He made answer, "I beg to be excused from saying anything at this time." If Lindy had simply responded "good," it would have saved a lot of time and avoided a rebuff to a man who was merely attending to his job.

Passenger: "In this plane absolutely safe?" Pilot: "Yes, Madam. It is the safest on earth."

SHARPENING TOOLS FOR WAR

Japanese soldiers stationed in Korea are shown busily sharpening their swords and bayonets before they leave their barracks for the zone of war in and about Mukden, Manchuria. How betide the luckless Chinese who encounter these fierce-looking warriors and feel the touch of that biting steel!

Science Of Farming

Instruction Necessary For Farmer To Keep Down Costs

Advancement of agricultural policies with greater differentiation of products and lowering of interest rates were urged by Premier J. E. Brown in an address at Calgary to the young men's section of the Board of Trade.

Great knowledge of the science of farming was urged by the premier, declaring that instruction was necessary, if the farmer were to keep down costs and produce the best quality grain.

"In addition, the farmer should not be expected to carry on against interest rates which are so much higher than that in other businesses. I believe that the Canadian people have sufficient ingenuity to devise a plan, whereby a central organization could act as a financial buffer for the farmer on the one hand, and the banks on the other," he declared.

Greater care in land settlement programmes was urged as a step to avoid difficulties of the future.

Dealing with the economic situation generally, the premier said, unemployment was still one of the greatest problems in the Dominion. No man could dispute the justice of trying to maintain a standard of life among his fellowmen, whether employed or not, but the abilities of governments should be taken into consideration, he said.

The Rock Of Fear

Blocks Channels Of Trade and Is Forerunner Of Catastrophe

If humanity would cast out fear, the ills that beset the world would begin to fade like mists of the morning.

Fear is the forerunner of catastrophe, the begetter of violence, the seed of discontent, the enemy of peace. Fear blocks the channels of trade and turns the money markets of the world into places where men whisper together and tremble at every rumor like leaves in the wind.

Fear puts the bomb into the assassin's hand.

Fear loosens the forces of persecution. Fear is the end of happiness. Cast it out. Be done with it. Make up your mind that your life will not be added to those shipwrecked on the rock of fear.

Eliminates Monoxide Fumes

Device Invented By Toronto Man To Protect To Motorists

Invention of a device which eliminates the deadly carbon monoxide fumes from automobile exhaust is the claim made by W. Gordon Marsh of Toronto. Substantiation of the claim is contained in a report by A. E. Smith, assistant professor of chemical engineering at the University of Toronto.

Mr. Smith made an analysis of a sample taken from a car fitted with the device and his signed report shows carbon monoxide had been almost completely eliminated.

Restores Spills Of War

The bronze doors of the Palais de Justice, carried off by the Germans during the occupation of Brussels, Belgium, have been returned to place after resting for the last sixteen years in possession of the German authorities.

How to shorten the depression: Pay as you go, and go somewhere.

Secrets Of Polar Regions May Yield To Investigations By Scientists Next Year

Higher Wheat Prices

Looks For Wheat To Sell At Price More In Line With Cost Of Other Commodities

Predicting that the price of wheat would rise to \$1.10 or \$1.12 per bushel to be in line with the price of other commodities, Professor A. M. Shaw, dean of agriculture of the University of Saskatchewan, expressed the opinion that at a Kiwanis dinner in Regina, that western Canada for years to come would have to look upon wheat as its main saleable product.

In dealing with matters of agriculture, particularly as they influence western Canada, Dean Shaw said that it was to the export market that western Canada had to look for the solution of its difficulties. He claimed that it was the export market that was bound at all times to influence the price of the agricultural commodities. The proposal for a second international polar year was first made by Vice-Admiral Dominik, director of the National Maritime Biological Service. The suggestion was adopted at the conference of Empire Meteorologists at London, England, in 1928, and the International Meteorological Conference at Copenhagen, Denmark, later that year.

A Feasible Route

Churchill Route Is Considered Favorable By Sea Captain

The shipment of grain and other cargoes through the Hudson Strait from Canada's new northern harbor, Churchill, to European ports, is very feasible, according to Captain W. J. Balcom, commander of the Canadian Government ice-breaker, "N. B. McLean," who returned to Quebec after spending three and a half months exploring Hudson Strait.

Captain Balcom said that the two grain boats, the "Farworth" with 1,400 tons of wheat and the "McLean" with 7,172 tons, were both escorted through the strait from Cape Chidley to Coates Island at the east end of the strait, on their trip to the Old Country. No trouble was experienced and the owners of the two vessels, in the world, signified their willingness to carry further cargoes from Churchill.

Conditions in the Hudson Strait this season have been the best in many years, the "McLean" commander stated, very little field ice being encountered, though Hudson's few bergs were sighted. The first snowing came on September 16.

"Wishing Tree" Damaged

Storms Break Historic Tree Near Belleville, Ontario

Following recent storms "the wishing tree," an ancient maple tree near West Lake, Belleville, Ontario, and one of the largest in the world, the maple species is suffering from broken limbs.

The great tree is over 160 feet high, but at present it is not over 60 feet in height.

Stephen Lake, age 90, has been engaged in cutting the fallen limbs into firewood. The wishing tree has long been a landmark in the County of Prince Edward and thousands of tourists have stopped under its spacious branches to make a wish. Historians claim that the tree is about 700 years old, and several novels have been written about it.

The Desert Of Reading

Description Dr. Locke Gives For Fiction

Believe As Fiction

"Fiction is the intellectual equivalent to a piece of pie which balances the textbook diet of the average college student," stated Dr. George H. Locke before a large gathering of the Victoria Women's Association and a number of undergraduates of the college in the library of Annesley Hall, Toronto, the occasion being the formal opening of the Chas. Walker Library for Reading.

"Read a book of fiction every month," Dr. Locke advised the students, "and don't let anybody persuade you that fiction is a bad thing. In fiction you will find the expression of style which you cannot get out of any other form of literature." He urged a passage from the Encyclopedia Britannica.

King Hags Many Groups

During his residence at Balmoral Castle, Scotland, King George again became an enthusiastic group hunter. All one day he tramped knee-deep through broken and heather or rode up steep slopes in the wilds of rugged mountains in pursuit of the birds, and bagged many of them.

Secrets of the polar regions may be disclosed next year as scientists

expeditions at points in the Arctic and Antarctic. The expeditions will spend 14 months in the rigid zone and are expected to bring back important data on weather conditions, the feasibility of aeronautical navigation across the Arctic regions and the phenomena polar.

Five of the special observations will be established in Canadian territory and the Dominion will play a leading part in the effort to disclose some of the hidden atmospheric and magnetic secrets of the polar areas.

The Arctic and Antarctic invasion recall the first meteorological polar year in 1882-83.

The ten countries, in addition to Canada, which are participating in the enterprise, are Great Britain, France, the United States, Holland, Sweden, Norway, Denmark, Russia, Germany and Italy.

Documents and data relating to the expeditions are accumulating in the office of John Patterson, head of the Dominion Meteorological Service, a member of the original committee of four which laid the ground work for the plan. The proposal for a second international polar year was first made by Vice-Admiral Dominik, director of the National Maritime Biological Service. The suggestion was adopted at the conference of Empire Meteorologists at London, England, in 1928, and the International Meteorological Conference at Copenhagen, Denmark, later that year.

Investigation of polar atmosphere and magnetism and the aurora borealis, particularly known as the northern lights, have been regarded as increasingly important in the elucidation of meteorological problems. The first polar year made it possible for the first time in history to make a systematic study of magnetic elements in the region of the North Pole, and provided material for magnetic charts of Arctic areas which are still in use.

It is believed, however, that, extending over a number of additional years, the study of the polar atmosphere and magnetic conditions in the 50 years since the last expedition has been the first time in history.

As far as possible all the stations occupied in 1882 will be used next year. In the interest of uniformity of observation, but a number of additional stations will be established to increase the comprehensiveness and scope of the work.

Stations were established at Fort Rae and Fort Congor in 1882, but three Canadian outposts will be new. They will be at Chesterfield Inlet, on the northwest side of Hudson's Bay; at Copernicus, on Corporation Gulf, and at Meade, 75 miles north of Chesterfield Inlet. Rae is situated on the north arm of Great Bear Lake.

Bright Student

Saskatchewan Boy Makes Remarkable Progress With Studies

Ted and Doug, 12 and 10, are a boy wonder in Douglass S. McDougall who completed 12 years of public and high schooling in 9 1/2 years, but a Saskatchewan lad, Albert Burr, of Manor, can give him one better.

Young Burr has produced an affidavit to show that he made the same progress as McDougall in eight years, five months and 20 days. The youthful six footer of Manor now wants to go to college and is trying to find the means to do it.

Not Solliciting Advice

Telephone Operator—"I have your party. Deposit five cents please."

Stunt at pay station—"What?"

Operator—"Please deposit your money."

Bonus—"Listen, girls, what I want is a bonus from a free! not financial advice from a stranger."

In Poland, women over twenty-five years of age vote for the Lower House, and those over thirty-five for the Upper House of Parliament.

The Happy Event

"Of course, I recognize him—and yet I say I am suffering from a case of nostalgia." Gustav Meschins, Altian.

"Fresh from the gardens"

The Hudson Bay Route

The recent successful voyage of the steamer "Farnworth" from Churchill to London, England, loaded with the first cargo of wheat from Western Canada's own report, and which voyage was made in the short space of sixteen days, marks an epoch in Canada's maritime history.

It is true that vessels have passed in and out of Hudson Bay every year for more than a century; it is even true that two rival navies entered the Bay, fought a battle there, and sailed out again. It is also true that the success attending the voyage of the "Farnworth," and its sister ship, the "Workworth," was an outcome fully expected by the British.

The importance of this venture lies in the fact that it provided the first demonstration to Eastern Canada and the world that the West's belief in the feasibility of the Bay route, and its demands, extending for fifty years back, for the construction of the railway to the Bay were fully justified.

It has been proven that the Bay route can be made a commercial success; that the 1,000 mile shorter route from the heart of the grain-growing prairies to the centre of the Empire is a practical route. But the fast, safe trips of the "Farnworth" and "Workworth," through what had for years been regarded as the "frozen North," are not in themselves sufficient guarantee that the new route will become the important factor it should be in the economic history of Western Canada.

The Hudson Bay route is 1,000 miles shorter than any other route; it is feasible; it is practical; it can be made a success. But, in order to be a complete success and to provide an adequate return to the people of Canada for the \$50,000,000, more or less, expended on the railway, the port terminals, and for navigation aids through the straits, other things are essential. Unfortunately, some of the things that are essential are the controversial of rival policies of political parties. With these rivalries this column has no concern, but, speaking for the West, it must be said without any qualification that they cannot, must not be allowed to hamper the success of the Bay route.

Among the things now essential to the success of that route are:

(1) The lowest possible rates of freight on both outgoing and incoming shipments over the Bay route, and the application of the same rates to all its details of the Crown's West Coast passages to the Hudson Bay railway.

(2) The lowest possible rates on both vessels and cargoes utilizing the Bay route, and, in connection, absorption by the Federal Government of any excess in such rates charged over and above those obtaining on other routes until experience demonstrates what the proper rates should be.

(3) The removal of any existing obstacles to the freest possible passage and entry of merchandise and products of all kinds from the more easterly sections of Canada and the markets of Europe into Western Canada by means of the Bay route and the port of Churchill, without regard of existing obstacles to be accompanied by every reasonable encouragement of such traffic. This is essential because no railway, and no ocean-going vessel can quote low rates if it can depend on only one-way traffic.

(4) Finally, it is important that certain branch lines of railway be built in the West which will have the effect of connecting up existing lines in the shortest and most direct way possible with the Hudson Bay railway. This can be done in the majority of cases with comparatively short cut-offs. Some people advocate making Churchill not only a national port, but a free port. That may or may not be feasible. Such a decision would have an effect on the whole local and economic systems of the Dominion, although unquestionably it would give a great boost to the Bay route and make its success assured.

The point of this article, however, is just this: The Hudson Bay route can, we believe, be made to realize the dreams of western people; it can be made a financial success as well as a great economic and commercial enterprise. The opportunity and the responsibility now rests with the people of the West, irrespective of class or party, to work together in union to achieve that result. Freight rates must be the lowest possible; insurance rates likewise; necessary railway branch cut-offs must be built; obstacles, if any, to movement of traffic removed; full encouragement for use of the route provided. All political parties have had a hand in the building of the railway and the opening of the route; all have committed their share to success. So, regardless of party, all Westerners should work together to make that success an assured fact.

Upset Telegraph Service

East African Natives Used Wires For Personal Adornment

Telegraph wires, in varying lengths, attached here and there to otherwise scanty clothing, means chic to the natives of Tanganyika and Kenya, South Africa, and as a result the capital was without wire service to the coast for more than 24 hours.

The demand for wire for sartorial purposes exceeded the available non-commercial supply, so the natives cut telegraph lines about 24 miles from Mombasa and took what they wanted. Cable messages had to be sent to Mombasa, and thence by train, until the damage was repaired. The delay was 48 hours.

The sun is estimated to have 50,000,000 tons of gas heated to 11,000 degrees Fahrenheit.

Most of the people who talk about hard times don't know anything about it.

for NEURITIS

One thing that helps is to wear a little Aspirin. It's the simplest and surest. Then rub the liniment gently over the affected area.

Pain eases off!

Big Blueberry Crop

Shipment Of Blueberries From Kenora This Year Totaled 255,000 Pounds

One Kenora country showed a remarkable increase this year, as compared with 1930. Blueberries shipped from Kenora this year showed an approximate increase of eighty per cent. over last year's shipments.

The 1930 blueberry crop was 145,000 pounds, or some 8,700 baskets, while this year the shipments totaled 255,000 pounds, or some 15,300 baskets. While the price this year was lower than last year, yet the increase was even more marked. In fact that there was always a market this season for the berries, a fact that is not always explained in other years.

All Dressed Up

Mahatma Gandhi and other delegates to the second round-table conference were invited by the Lord Chamberlain to attend a party at Buckingham Palace. Commenting on his mode of dress, Gandhi said, "I will wear my humble dress of khadi-chhoti and sandals."

A kind of paradise ornaments the new special summer resort at Quivira to commemorate 10 years of British occupation.

An air-cooled, dustless and virtually noiseless sleeping car has been designed for tourists travelling on railways.

Woodrow Wilson is the only president of the United States buried at Washington, D.C.

Life Insurance in Canada

Per Capita Record Surpassed Only By United States

A statement issued by the Life Insurance Survey Branch Bureau shows that in the first nine months of the present year a total of \$367,223,000 of new paid-up life insurance has been sold in Canada and Newfoundland.

This hardly indicates that Canada is broke. It indicates that Mr. Bennett should be required to float in internal loan he could be caught to have difficulty in raising an amount up to \$200,000,000.

Incidentally, speaking of life insurance, the total of insurance in force in Canada at the present time is \$85,000,000,000, or \$650 for every man, woman and child in the Dominion. It is a per capita record surpassed by only one country in the world, the United States—Ottawa Journal.

NEIGHBORS TALK

"I am employed in a theatre and it is a problem to keep my mother and sisters. I like to dress well but haven't very much to spend on clothes. To give the appearance of variety to my wardrobe I have bought a collection of a dress or stockings as soon as the money became faded. I have seen on Diamond Dyes for the work—using them as dyes for dresses and not for stockings. I have seen that such perfect results that our neighbors talk about the great number of new things I have."

"I learned about Diamond Dyes from our wardrobe mistress. She says they give a new look to the market but none do such splendid work and are so easy to use as Diamond Dyes. I have seen they are the world's most popular dyes—and they deserve to be."

L.P., Montreal.

Auditorium For Winnipeg

Federal Government Will Share In Cost Of Construction

Approval by the special sub-committee of cabinet on unemployment relief of \$1,250,000 additional expenditure for the Province of Manitoba, including the Federal Government's share in the cost of construction of a large auditorium in the City of Winnipeg, was announced by Hon. G. D. Robertson, Minister of Labor, and chairman of the sub-committee.

Federal Government commitments for the Province of Manitoba are now upward of \$2,250,000, as compared with \$900,000, which was the Federal allotment for Manitoba last year in addition to the necessary direct relief on an equal three-way basis between the cities, province and Dominion.

Asthma. What the man or woman subject to asthma (bronchitis) can do. What can be more terrifying than to suddenly be attacked by a paroxysm which seems to fairly threaten the existence of life itself. French chemists, Dr. Kellogg's Asthma Remedy has been found to be a cure for asthma, health and happiness. It is known and prized in every section of this broad land.

Visitor (at church fair)—The pastor's wife seems rather upset; do you know the reason?

Church Warden—Yes, she put her hat down when she came to help, and some one took it for thirty cents.

Must Ensure Safety First

Greater Need Of Present Time Than More Speed

"With the super-highways and the marginal roads that are being built around cities, normal speeds of 65 to 70 miles per hour or more will without doubt be possible." Such is the prediction made recently by an automotive engineer. Automobiles are killing more than 30,000 persons annually in the United States. Nearly half of the victims are pedestrians. More than 900,000 persons were injured in automobile accidents last year. About one-third of them were pedestrians. An automobile creeping slowly along does not crash into trees and fences as a rule. An automobile creeping slowly along does not knock down pedestrians as a rule. The need of the present is not more speed but more safety. Any attempt to get more before we get more safety means not progress but madness.

Not Much Fun

Babe Ruth can't attend the movies, drive his car or eat lunch in a rich food, or stay out late at night. The world little knows, as the New York Times observes, how dreary it is to be a baseball player drawing \$80,000 a year.

Mistress—"I don't understand why the Sultan doesn't come to dinner."

The Maid—"Oh, I had a toothache and called them out asking if they'd just as soon come next week."

Now is the time to lay plans for the tourist trade of 1932.

TOO FAT AT 22

Lost 19 lbs.—And Backache

"I am 22 years of age, and I weighed 163 lbs. I had pains in the back and neck. I didn't care about anything, but I was sick of taking stuff. I tried Kruschen Salts, I would not at first—was sick of taking stuff. But I tried Kruschen Salts, six months ago, I have lost 19 lbs., and I am very healthy, so I am very thankful to Mrs. Kruschen—who recommended Kruschen Salts to me."

The condition which caused this woman to get so stout was due to the cause of her backache and headaches. The whole trouble was due to the internal organs failing to expel from the body, regularly and completely, the waste products of digestion.

The six salts of Kruschen assist the internal organs to perform their functions properly—to throw off each day the waste and poisons that cumber the system. Thin, little by little, the body fat goes down, the weight disappears. You feel wonderfully healthy, youthful and energetic—more so than ever before in your life.

Russia and Germany

Soviets Have Good Reason For Not Stirring Up Revolution

For once the Soviet Government of Russia has been reluctant to play with fire in a powder house. On every earlier occasion when Russian agents in Moscow suggested the revivification of a civil, financial, situation, Russian agents were busy in Hamburg, Dresden, Berlin, and other cities, trying to stir up revolution. In the present case Russia has apparently kept hands off, and the role of the dispatches from Moscow suggests the reason.

Russia's chief interest today is the five-year plan. If this plan is to succeed, the Soviet build must be established. One of the best markets for Russian exports is Germany. Revolution in Germany might endanger the five-year plan by depriving Russia of an indispensable outlet for the raw materials which she must sell abroad in order to pay for the cost of purchasing machinery and tools.

If the Soviet's policy toward Germany is any guide, the world has less to fear from Russia, seeking power on the markets for her wares, than from Russia, starving and empty handed.

Free Scholarship

C.P.E. Offering Scholarship At McGill To Apprentices

A free scholarship, covering either five years in arts degree in chemical, civil, mechanical or electrical engineering, or five years in architecture at McGill University, is offered by the Canadian Pacific Railway Company subject to competitive examination, to its apprentices and other employees who are less than 21 years of age, and to the minor sons of employees, according to a bulletin issued by Grant Hall, vice-president of the company.

Candidates will qualify by writing either the high school leaving examination of the Province of Quebec, or the mechanical examination of the university, or elsewhere in Canada, in June, 1932. The candidate receiving the highest average in subjects required for admission will be awarded the scholarship, with choice of any of the courses mentioned. The scholarship is renewable from year to year, provided its holder is entitled to full standing in his next year.

Must Ensure Safety First

Greater Need Of Present Time Than More Speed

"With the super-highways and the marginal roads that are being built around cities, normal speeds of 65 to 70 miles per hour or more will without doubt be possible." Such is the prediction made recently by an automotive engineer. Automobiles are killing more than 30,000 persons annually in the United States. Nearly half of the victims are pedestrians. British Postal Notes

Post Office Department Says British and Irish Free State Postal Orders No Longer To Be Cashed

Due to the depreciated British pound, orders have been issued by the post office department that British and Irish Free State postal notes are no longer to be cashed. The order does not apply to postal money orders. The explanation given at Ottawa is that postal notes are settled with London on a different basis to money orders, and involve the risk of exchange fluctuations. In any circumstances, the Canadian post office authorities have been inclining to the view that circulation of British and Irish Free State postal notes should cease in Canada and the present chaotic exchange situation appears to provide a suitable occasion for bringing the change of policy into effect.

These governments, however, on advice from Ottawa, have now ceased to issue postal notes for Canada, and will issue only money orders hereafter. The money order, it is stated, does not involve any exchange risk.

The British exchange situation also has had repercussions on the circulation in Canada of British bank notes. The pound and ten shilling notes, it is learned, are no longer being accepted by many of the Canadian banks.

Cancer Clinic

Saskatchewan Taking Advanced Steps Toward Control Of Disasters

As a further step in the campaign of the Saskatchewan Cancer Commission, a government treatment clinic will shortly be established in Regina and Saskatoon. The commission has established a fund for the purchase of and use of radium for cancer patients suffering from malignant diseases. Definite date for the opening of the clinics has not been decided.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET PEOLER
Author of
"The Splendid Folly," "The Hermit of Fox Lake,"
Hodder & Stoughton, Ltd., London.

CHAPTER V.—Continued.

"Thank God!" she heard him mutter. Then, aloud, reassuringly: "I've got my end of it all right. Now, can you catch hold of the strap and raise yourself a little so that I can reach you?"

Jean obeyed. A minute later she felt his arms about her shoulders, underneath her armpits, and then very slowly, but with a sure strength that took from her all sense of fear, he drew her safely up beside him to the high ground.

For a moment they both rested quietly, recovering their breath. The Englishman seemed glad of the respite, and Jean noticed with concern the rather drawn look of his face. She thought he must be more played out than he cared to acknowledge.

Across the silence of sheer fatigue their eyes met—Jean's filled with a wistful solicitude as unconscious and candid as a child's, and the other, meeting her, by brilliant and inscrutable—and in a moment the silence had become something other, different, charged with emotional significance, the result of a silence which falls suddenly between a man and woman.

At last:
"This is what comes of stealing a day from Mrs. Grundy," commented the man dryly.

And the tension was broken. He sprang up, as though anxious to maintain the recovered atmosphere of the commonplace.

"Come! Having said her best and tried instinctively to down you in a ditch, I expect the old lady will let us get home safely now. We're through the worst. There are no more drifts between us and the hotel."

It was true. Anything that might have spelt danger was past, and it only remained to follow the beaten track up to the hotel, though even so, with the wind and snow driving in their faces, it took them a good half-hour to accomplish the task.

Monsieur and Madame de Varigny, a distracted "maître d'hôtel" and a little crowd of interested and sympathetic visitors welcomed their arrival.

"Mon dieu, mademoiselle! What we rejoice to see you back!" exclaimed Madame de Varigny. "We ourselves are only newly recovered—though, with difficulty, through this terrible storm—and we arrive to find that none knows where you are!"

"Me, I made sure that mademoiselle had accompanied Madame la Comtesse," asserted Monsieur Vautrin, nervously anxious to exonerate himself from any charge of carelessness.

"We were just going to organize a search-party," added the little Count, "I, myself—stoutly—should have joined in the search."

Wary as she was, Jean could hardly refrain from smiling at the idea of the diminutive Count in the role of gallant preserver. He would have been considerably less well-qualified even than herself to cope with the drifting snow through which the sheer, dogged strength of the Englishman had brought her safely.

Instinctively she turned with the intention of effecting an introduction between the two, but she was the only one to find that he had disappeared. He had taken the opportunity presented by the little ferment of excitement which had greeted her safe return to slip away.

She felt oddly disconcerted. And yet, she reflected, was so like him as the conception of him which she had formed, at least—to evade both her thanks and the enthusiasm with which a recital of the after-

noon's adventure would have been received.

CHAPTER VI.

The Magic Moment

Jean, surprisingly revived by a hot bath and a hot drink, and comfortably tucked up beside the fire in her room, was recounting the day's adventure to Madame de Varigny.

It was a somewhat expurgated version of the affair that she outlined—thoughtfully calculated to ally the natural apprehensions of a temporary chaperon—in which the unknown Englishman figured innocuously as merely having come to her assistance when, in the course of her afternoon's tramp, she had been overtaken by the blizzard. Of the stolen day, snatched from under Mrs. Grundy's quelling nose, Jean preserved a discreet silence.

"I don't know who he could be," she purred. "I've never seen him on the beach; I should certainly have recognized him if I had. There was a lean, brown man, very English-looking—that sort of cold-blooded-every-morning effect, you know. Oh! And he had one perfectly white lock of hair that was distinctly attractive. It looked—descriptively—'as though someone had dabbed a powder-puff on his hair—just in the right place.'"

Madame de Varigny's eyes narrowed, and a quick calculation escaped her. It was something more than a mere exclamation commencing interest; it held a definitely indelible note, although it sprang from some sudden access of personal feeling.

Jean, hearing it, looked up in some surprise, and the other, meeting her questioning glance, rushed hastily into speech.

"A lock of white hair? But how chic! It should not—thoughtfully—be difficult to discover the identity of anyone with so distinctive a characteristic."

"He is not staying in the hotel, at all events," said Jean. "He told me he was at a friend's house."

And he did not enlighten you as to his name? Gave you no hint?"

Madame de Varigny spoke with an assumption of indifference in her liquid voice.

Jean shook her head, smiling a little to herself. It was the best part of the charm of that brief companionship that neither of the two comrades knew any of the everyday, commonplace details concerning the other.

"Perhaps you will see him again at the rink tomorrow," suggested Madame de Varigny, still with that note of restrained eagerness in her tones. "The snow is not deep except where it has drifted; they will clear the ice in the morning."

Jean was silent. She was not altogether sure that she wanted to see him again. As it stood, robbed of all commonplace circumstances of conversation, the incident held a certain glamour of whimsical romance which could not but appeal to the daughter of Glyn Pasternak. Nicely rounded off, as, for instance, by the unknown Englishman's prosaically calling at the hotel the next day to enquire whether she had suffered any ill effects, it would lose all the thrill of adventure. It was the suggestion of incompleteness which favored the entire episode so piquantly.

No, on the whole, Jean rather hoped that the next day she would meet the Englishman again—at least, not yet. Some day, perhaps, it might be rather nice if chance brought them together once more. There would be a certain element of romantic fitness about it, should that happen.

"I don't think I am likely to see him again," she said quickly, replying to Madame de Varigny's suggestion. "I had me he was going away tomorrow."

Had it been conceivable, Jean would have said that a flash of disappointment crossed the Countess's face. But there seemed no possible reason for the movements of an unknown Englishman should cause her any excitement of feeling whether, pleasant or

otherwise. The only feasible explanation was that that old streak of inquisitiveness concerning other people's affairs which appeared to be characteristic of her and which she had before evinced concerning the circumstances of Lady Anne Brennan.

Whatever curiosity she may have felt, however, on this occasion Madame de Varigny refrained from giving expression to it. Apparently dismissing the subject of the Englishman's identity from her mind, she switched the conversation into a fresh channel.

"It is unfortunate that you should have met with such a contretemps to-day. You will not feel disposed to dance this evening, after so much fatigue," she observed commiseratingly.

But Jean scented the notion. With the incomparable restlessness of youth, she felt quite equal to dancing all night if needs be.

"Mais tout au contraire," she exclaimed. "I'm practically recovered—at least, I shall be after another half-hour's lazing by this glorious fire. I wonder what heaven-sent inspiration induced Monsieur Vautrin to install a real English fire-place in this room? It's delicious."

The Countess rose, shrugging her expressive shoulders.

Recipes for This Week

(By Betty Barclay)

GRAPE JELLY ROLL

(4 cups)

- ¾ cup special cake flour, sifted.
- ¾ teaspoon baking powder.
- 1 teaspoon salt.
- 4 eggs, unbeaten.
- ½ cup sugar.
- 1 cup grape vanilla.

Grape jelly.

Sift flour once; measure. Combine

baking powder, salt, and eggs in bowl.

Place over smaller bowl of hot water,

and beat with rotary egg beater, adding

sugar gradually, until mixture be-

comes thick and light-colored. Re-

move bowl from over hot water. Fold

in flour and vanilla. Pour into pan,

15½ x 8½, inches lined with greased

paper. Bake in oven (400 degrees

Fahrenheit) 15 minutes. Turn from

pan at once onto cloth covered with

powdered sugar. Remove paper.

Quickly cut off crisp edges of cake.

Spread with jelly and roll. Wrap in

cloth until cold.

CHERRY BERRY DESSERT

1 junket tablet.

1 tablespoon cold water.

1 cup cranberry jelly or marmala-

de.

1 pint milk.

3 tablespoons sugar.

1 teaspoon vanilla.

Prepare the junket according to

directions on package. Pour one

cup into individual deep glasses and

let stand undisturbed in a warm

place about 10 minutes. Then

chill. When ready to serve, add

cranberry jelly or marmalade to each

glass. A topping of sweetened whipped

cream may be put over the cranber-

ries if desired.

Economic Conference Likely

Governments Would No Doubt Accept Invitation For Next Year

The London Times says that when Prime Minister R. B. Bennett of Canada formally renounces his invitation to hold the adjourned meeting of the Imperial Economic Conference at Ottawa next year, the National Government will certainly accept it. The suggestion is made, the Times added, that the meeting should not be held too early in the year, in order that all the governments of the Empire might have ample time to make their preparations.

Millions For Dumb Animals

Dumb animals have come into millions. The money which will be used for their protection, was furnished by Mrs. Marion E. McConnell, 74, of Chicago.

"I don't think I am likely to see him again," she said quickly, replying to Madame de Varigny's suggestion. "I had me he was going away tomorrow."

Had it been conceivable, Jean would have said that a flash of disappointment crossed the Countess's face. But there seemed no possible reason for the movements of an unknown Englishman should cause her any excitement of feeling whether, pleasant or

otherwise. The only feasible explanation was that that old streak of inquisitiveness concerning other people's affairs which appeared to be characteristic of her and which she had before evinced concerning the circumstances of Lady Anne Brennan.

Whatever curiosity she may have felt, however, on this occasion Madame de Varigny refrained from giving expression to it. Apparently dismissing the subject of the Englishman's identity from her mind, she switched the conversation into a fresh channel.

"It is unfortunate that you should have met with such a contretemps to-day. You will not feel disposed to dance this evening, after so much fatigue," she observed commiseratingly.

But Jean scented the notion. With the incomparable restlessness of youth, she felt quite equal to dancing all night if needs be.

"Mais tout au contraire," she exclaimed. "I'm practically recovered—at least, I shall be after another half-hour's lazing by this glorious fire. I wonder what heaven-sent inspiration induced Monsieur Vautrin to install a real English fire-place in this room? It's delicious."

The Countess rose, shrugging her expressive shoulders.

(To Be Continued.)

Stormy Political Life

Ramsay MacDonald Has Had a Career Reading Like Fiction

Ramsay MacDonald was elected in his own constituency, because the Prime Minister's "Ain folk" stood by him in the stormiest hour of his stormy political career.

Born in a fishermen's cottage in Scotland, 64 years ago, Ramsay MacDonald had a career reading like fiction. Friendless, he went to London and for 10 years drank the bitter waters of poverty, following a literary life. The death of his wife in 1911 was the saddest blow of his life.

Entering Parliament in 1906, Ramsay MacDonald became chairman of the Independent Labor Party. This was in the days when such a step was tantamount to social, if not political, exclusion. When the war opened he assailed the Government for having blundered into the conflict. Despite peace by negotiation, and urging his support for recruiting, MacDonald became an out-cast—his name was shunned by all lines of war thought. He lost his seat in the Commons in 1918.

The turn of the political wheel brought MacDonald back to Parliament after the close of the war as Premier in January, 1924. After his pacifism was forgotten, if not forgiven. The wheel took another turn and Ramsay MacDonald became Premier in January, 1924. After his pacifism was forgotten, if not forgiven. The wheel took another turn and Ramsay MacDonald became Premier in January, 1924.

This lasted until last August, when MacDonald, Philip Snowden, James Thomas and ten other Laborites joined the Conservative and a portion of the Liberal Party in forming the National Government. The people of Scotland placed their stamp of approval on the latest, if not the most sensational step ever taken by Ramsay MacDonald.

An Oil That Is Prized Everywhere.—Dr. Thomas' Electric Oil was put upon the market without any flourish over thirty years ago. It was put up to meet the wants of a vast section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Stream Flow Conditions On Prairies

During the month of August, the Dominion Water Power and Hydro-metric Bureau, Department of the Interior, reports that stream flow conditions in southern Alberta and Saskatchewan continued to be extremely low. In the northern sections of Alberta much better conditions were experienced, the flow of the Peace River being slightly above the long term average for the month.

Audiences in a theatre or talking picture house absorb most sound in winter than in summer, due to the increase in clothing in the colder season.

Nearly half of the total area of Denmark was planted to cereals this year.

A new, different

MAGIC BAKING POWDER

This delightful tea menu suggested by Madame R. Lacroix, assistant director at the Provincial School of Domestic Science, outlandish Montreal Cooking School, will come in very handy next time you're entertaining. Keep it for reference.

TEA MENU
For Cold
Hot Cheese Biscuits
Sautéed Potatoes
Pineapple Ice Cream
Chase & Sanborn's Tea or Coffee

Madame Lacroix says: "For my part, I always use and recommend Magic Baking Powder because it is absolutely dependable. Its high levenging power is always uniform. You get the same satisfactory results every time you use it."

Dr. Carl E. Black, of Jacksonville, Ill., offered the College of Surgeons a plan for grading surgeons according to the death rate among their patients. There is an old saying that doctors bury their mistakes, while lawyers hang theirs. It is a fair guess that the surgeons will stand by the old saying.

First hesperides—"Don't tell my wife I let you borrow a dollar."
Second sap—"I won't if you don't tell my wife I had a dollar."

Life's saddest infidel is the man who believes not in himself.

When a Laxative Gripes! --- BEWARE!

Severe abdominal pain, griping, after taking a laxative is an indication of unnatural strain that should mean serious injury.

No laxative that causes such discomfort is necessary.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, after morning, lunch and dinner, sweetens the entire system. Acid stomach, flatulence, biliousness, quickly disappear.

ENO'S FRUIT SALT

The Value Of Laughter

Great Aid To Health and Longevity Says New York Pastor

Instead of telling us the mode of living, not usually applied with success to any other individual, by which he has attained the age of 96 years, Dr. George Alexander, pastor of the First Presbyterian Church of New York, says that when one is old he should "eat half as much, sleep twice as much, drink three times as much water and laugh four times as much."

This forward-looking wisdom, particularly happy, when it comes from past the allotted three-score and ten, is supremely leavened by the last admonition. Much has been written of laughter. Some hold that it is the mark of the ill-mannered fool. Some count laughter the desperate alternative of tears. Yet others agree with Carlyle, who though he often

was, when he says in Sartor Resartus that "The man who cannot laugh is not only fit for treason, stratagems and spoils, but his whole life is already a treason and a stratagem."

One should begin early in the journey to laugh, lest in his old age, even with laughter multiplied by four, he lacks a good proportion of mirth.

International Finance

No nation can live to itself in the financial sense. As someone has said: the countries of the world are roped together like Alpine climbers; if one falls over the precipice the strain falls on the others. Mark, franc, dollar, pound—their currencies are interwoven.—Daily Herald, London, England.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother's Worm Expeller.

After lifting a heavy sash in Covent Garden, England, and opening it in a field several miles away, thieves found only \$15.

Charlotte—It must be three years since I saw you last. I hardly knew you, you have aged so.

Clarina—Well, I wouldn't have known you, either, except for that hair.

The funniest girl to work or who marries with the idea that after marriage women do not have to work or worry.

Look for this mark on every tin. It is a guarantee that Magic Baking Powder does not contain alum or any harmful ingredient.

Try Madame Lacroix's recipe for HOT CHEESE BISCUITS

1½ cups flour
4 teaspoons Magic Baking Powder
2 tablespoons butter
1 teaspoon salt

Sift flour, baking powder and salt. With two knives, thoroughly mix flour, butter and salt. Rub the mixture with milk to make a soft dough. Roll quickly and lightly to one-half inch thickness and cut with a round biscuit cutter. Place on top of a sheet of cheese cloth, one-half inch thick, and bake in a vent 400° F. about 12 or 15 minutes.

More than 200 interesting, tested recipes are contained in the New Free Magic Cook Book. If you failed in the New Free Magic Cook Book, you failed at home, and for a copy. Write to Standard Baking Mills, Fraser Avenue, Toronto.

Paint is something used to improve the looks of buildings and spoil those of the girls.

New National Viewpoint

Canadian Writers Of Our Nation Should Portray Scenes Of Their Own Country

Some sound advice was given to Canadian authors recently by John Burroughs, the well known English essayist. While he finds our literature of a surprisingly high average, he deprecates the lack of Canadian localities. He thinks the Canadian writer allows himself to be distracted by London and New York, to the detriment of his own country, when it comes to backgrounds and settings for stories, and that it would be better to portray the Canadian scene and situations.

There is no doubt whatever that Mr. Burroughs has put his hand upon a real need. There are very few novels about Canada and the people of Canada—novels that would convey to people outside Canada a clear idea of the Dominion, its inhabitants, their ideals, their methods, their mentality. Yet that is the sort of novel we need for our fiction is to become national in anything more than the publisher's imprint.

Mr. Burroughs sees a new national viewpoint and new standards of judgment needed for the young writer of this country. Doubtless both will come in time, but the present tendency is rather away from Canada and the national viewpoint than towards such an ideal. Our poets get much nearer it than our writers of prose.

The lure of the cheap magazine with its false standards of life has proved too strong for a good many Canadian writers, who might have a good service to Canadian literature had they been able to withstand that lure. Criticism, such as Mr. Burroughs has offered, is therefore, all the more to be noted as pungent and appropriate.

Canadian apples and honey made an excellent record at the Imperial Fruit Show, which opened in Manchester, England, October 30.

Word was received by the Hon. Robert Weir, Minister of Agriculture, that in the class open to the British Empire, British Columbia won two second awards, one for dessert and the other for culinary apples. The entries included fruit grown in England as well as in Australia, New Zealand and South Africa. The southern Dominion's fruit had been secured in London early in June.

In the section open to Canadian-grown fruit, British Columbia and Nova Scotia divided honors.

The agent-general's cup for the exhibition gaining the highest number of points was won by Jas. Lowe, of Oyrans, Ontario.

For the first time in the history of the Imperial Fruit Show honey was included. In the three sections open to the Dominion and Colonies, Ontario exhibitors won two first awards, while exhibits from British Columbia won one first, two seconds, and three third awards.

Make Fresh Start

Honors for the aged men are still maintained, but not so for aged women. They say when a woman begins to grow old these days she bobs her hair, shortens her skirt and starts all over again.

An engineer in Scotland has invented a new lubricant, which gives warning of the danger of over-heating bearings by emitting a specific odor.

PARIS HAS MADE HIP-SINGNESS MODISH IN THIS PRETTY

DAY MODEL

The slendering front pointed seaming of the skirt gives charming height to the figure. And last the neckline becoming, collarless with up-piled bands and jabots.

Style No. 520 is designed for sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42.

The 36-inch skirt requires 3 1/2 yards of 28-inch material. Suggest woolens, crepe marocain and crepe satin make up attractively in this model.

All patterns 25 cents in stamp or cash (note preferred). Wrap coin carefully.

The Antidote For Fear

Courage, Confidence and Hope Needed By World Today

The curse of humanity has always been fear.

Fear dates back to the beginning of man.

Fear is the mother of hatred, the instigator of murder, the begetter of wars.

Fear is the enemy of sanity, the spoiler of judgment, the defiler of the soul.

Fear turns day into night and makes men walk in darkness.

Fear is the forerunner of distress, the foe to prosperity, the preserver of poverty.

Fear is the failure of the spirit, the triumph of the primitive over the civilized, the victory of death over life.

As individuals and as a nation we should cut fear from us.

Courage, confidence, hope—these are the antidotes and the world has great need of them today. Fear is the thing that halts progress and creates difficulties, makes people hesitate where courage would see them through.

Tender-handed stroke a nettle. And it stings you for your pains; Grasp it like a man of nettle—

And as soft as silk remains.

—London Daily Express.

Canadian Fruit and Honey Given Awards

Excellent Record Was Made At Imperial Fruit Show

Canadian apples and honey made an excellent record at the Imperial Fruit Show, which opened in Manchester, England, October 30.

Word was received by the Hon. Robert Weir, Minister of Agriculture, that in the class open to the British Empire, British Columbia won two second awards, one for dessert and the other for culinary apples. Dr. Carter's Little Liver Pills are not ordinary laxative. They are ALL VEG-ETABLE and have a very definite, valuable tonic action upon the liver. They Constipate, Indigestion, Acidity, Headaches, Poor Complexion. All druggists. 25c & 75c per box.

Diagnoses With Einstein

Retreating Stars Determine Size Of Universe Opinion Of Dutch Astronomer

The stars, constantly retreating toward the limitless rim of the Milky Way, are the factors that determine the size of the universe, says Professor Willem de Sitter, noted Dutch astronomer. He spoke on "the size of the universe" in the Prick Chemical Laboratory of Princeton, New Jersey, University.

The universe is of a definite size, Einstein, the German mathematician, but it is continually expanding, because of the retreat of the stars, which broadens the limits of the universe.

Dr. de Sitter's exposition is at variance with the theory of Albert Einstein, the German mathematician. Einstein's static theory has the universe starting at a certain size and increasing to become an indefinite. After an initial postulate that the volume of space was first filled homogeneously with a certain amount of matter but with no repulsive force.

Compared his own theory of a finite universe having no matter, only motion. Its size has constantly increased, the professor said, but still remains finite—or limitless.

Attacks Current War Stories

Canadian Soldiers Not Moral Warfare Says Lieut.-Colonel Drew

Lieut.-Col. George A. Drew, who has on former occasions leaped into the thick of the stage as the defender of Canadians in the Great War, assumes his familiar role again.

Soldiers, he declares, are not such moral wallkings as they are pictured in current war stories. There is no doubt that Col. Drew speaks truth, and also that his indignation over some of modern works of "literature" is justified.

Too many writers, in their use of "revelation," have laid entirely too much stress on happenings which, though probably genuine, do not truly reflect the life of the soldier in his comprehensive way. They have shown only one side of the picture, and in doing so have been guilty of a great injustice.

Many of the books that make pleasant reading for the children and grandchildren of the men who fought, the descendants who have an indelible right to a righteous and glorious pride in the achievements of their forebears.

THE RHYMING OPTIMIST

By Aline Michaels

THE FLAME

As a man may kindle a flame that glows

On a hearth in a cold, bare room

'Till its dancing light, all color of rose,

Floods the place with its warmth and

He has lighted a spark in many lives

With his touch of his spirit's fire

He has kindled the dream that

Through all survives,

He has quickened the high desire.

As a blaze with its glamour of ruby light

Transfigures a room once bleak,

So the flame of his courage, clear and bright,

Brings the power the timorous seek.

He has brought into lives that were

Drear and cold,

Into doubting hearts of youth,

A gift which has solace for young and old,

The flicker of living truth!

The Lovely Wakesies

New Waltz and Song Enjoying a Vogue in the West

Extolling the beauties of Wakesies Lake, the national playground in Northern Saskatchewan, Mr. S. Brundage of Regina, has published a song entitled "The Lovely Wakesies."

A very delightful musical setting has been arranged by Margaret Lindsay, also of Regina, and the song has been dedicated "To those who have loved and labored in the Canadian Northwest." Words of the song are as follows:

I've wandered over eastern hills, I've

And western plains, I've

And revelled in the beauty of the waving golden grain,

But nature holds a nobler gem the lovely Wakesies.

O'er hill and dale and winding trail I'm coming back to you.

Thy face reflects the setting sun in

Shy shaded alder.

The woodland marks thy limits with

Fronds of softest green;

Thy waters crown a hillside soft as a

Mother's song.

That soothes to rest the weary mind,

Whose childhood memories throng.

The flowers deck thy verdant banks,

The sweetest whisper low.

And send a benediction in the silvery

Light of the night.

The northland calls her children home

To lovely Wakesies

O'er hill and dale and winding trail I'm coming back to you.

SUNDAY SCHOOL LESSON

NOVEMBER 15

PAUL IN JERUSALEM

Golden Text: "Thou shalt be a witness for Him unto all men of what thou hast seen and heard."—Acts 22, 15.

Lesson: Acts 21:17 to 23:30.

Devotional Reading: 2 Corinthians 4:7-15.

Explanations and Comments

Paul's Reception At Jerusalem, verses 17-19.

The leaders of the Church at Jerusalem received Paul cordially. James was in the company that greeted him, but Peter seems not to have been present. Paul came to them with a wonderful story of how the gospel message had been received among the Greek Jews and Gentiles, and with abundant proof of their regard for the Mother Church.

It is evident that Paul had thought this gathering of contributions from his Gentile churches to be "the crowning act," as Professor Ramsay declared of his work in the four Greek provinces of Galatia, Asia, Macedonia, and Achaia. Yet there is no mention of any expression of gratitude on the part of the receivers. The omission is pointed to one who has followed with intense interest Paul's course and aim.

Apparently the apostles and elders of Jerusalem passed at once to what was the real business of the meeting. The theological and theoretical overtones of the practice in this early Christian group as they have done so often in all the ages since.

An equally similar spirit reigned among the representatives of the churches in England in Africa.

Forty years since. Missionaries were eager to see these High Churches.

"Brothers, we hear that you have received at your Communion Table missionaries who do not belong to our sect."

So Canada with its ten million population has 159 more governing members than Britain with its population of 47,000,000.

How To Forecast Weather

Missouri Prophet Says It Always Runs in Cycles

Buffalo's mystical man baseball prophet has a rival at Macon, Missouri, in a farmer, unknown to fame, who says this business of weather forecasting is a simple matter if you keep tab of the first ten days of each three-month cycle.

He submits his scheme, with a challenge, to W. C. Brown, chief of the weather bureau there. He suggested that Brown junk his rain gauges and barometers and adopt his system.

Weather during the first ten days of each three months cycle indicates what will happen during those months, he contends. His cycles begin in January, April, July and October.

Czecho Slovakia has started this year's crop which will cost nearly \$150,000,000.

Motorists pay \$151,000,000 a year in gasoline taxes.

NEW NATIONAL CABINET FORMED BY MACDONALD

London, Eng.—In his Lonsdowne retreat, Premier Ramsay MacDonald completed drafting his new National cabinet. A cabinet of 20 replaces the emergency cabinet of 10.

It is as follows:

Prime Minister and First Lord of the Treasury, Rt. Hon. Ramsay MacDonald, National-Labourite.

Lord Privy Seal, Rt. Hon. Philip Snowden, National-Labourite.

Chancellor of the Exchequer, Rt. Hon. Neville Chamberlain, Conservative.

Secretary of State for Home Affairs, Sir Herbert Samuel, Liberal.

Secretary of State for Foreign Affairs, Sir John Simon, Liberal.

Secretary of State for the Dominions, Rt. Hon. J. H. Thomas, National-Labourite.

Secretary of State for the Colonies, Sir Philip Cunliffe-Lister, Conservative.

Secretary of State for War, Lord Halifax, Conservative.

Secretary of State for India, Sir Samuel Hoare, Conservative.

Secretary of State for Scotland, Sir Archibald Sinclair, Liberal.

Secretary of State for Air, Lord Londonderry, Conservative.

First Lord of the Admiralty, Sir E. D. White, Conservative.

Minister of Health, Sir H. Hillier Young, Conservative.

President Board of Education, Sir Donald MacLean, Liberal.

Minister of Agriculture and Fisheries, Sir John Gilmour, Conservative.

Minister of Labor, Sir Henry Bertie, Conservative.

First Commissioner of Works, Rt. Hon. William Ormsley-Gore, Conservative.

The National cabinet of 10—functioning before the general election—was formed after the collapse of the Chamberlain administration. It consisted of four Labor members, four Conservatives and two Liberals.

The new National Government, reflecting to a certain extent the sweeping changes which the general elections made in the complexion of the House of Commons, consists of 10 members, five Liberals (including Sir John Simon) and four National-Labourites.

The two key positions of Chancellor of the Exchequer and President of the Board of Trade go first to Neville Chamberlain, the second to Walter Runciman. The new cabinet also includes a protectionist, replaces Philip Snowden, a free trader, who becomes Lord Privy Seal in succession to Lord Peel.

At the opening of the new campaign at Birmingham, Mr. Chamberlain, referring to the adverse balance of trade, said: "I think in Birmingham we shall all be united in feeling there is no policy we can seek that can be an effective substitute for the policy of protection which our home industries and for the maintenance of our home standards."

The holder of the other key position regarding trade, Sir Philip Runciman, has been a life-long free trader although before the elections he declared his readiness to support an embargo against imported luxuries if he believed that step necessary to redress the balance of trade.

Sir Philip Cunliffe-Lister, who leaves the Board of Trade for the secretaryship of the colonies, also is a firm believer in protective tariffs.

Lord Halifax, who has been promoted from Parliamentary Under-Secretary for the Board of Trade to Secretary of Health, argued during a campaign meeting at Carlisle that the general low-revenue tariff of 10 per cent. or so would serve to stabilize the pound. "It must be," he said, "on the basis of 23 per cent."

Harvester Company Resumes Operation

Plants Have Been Re-Opened In Canada and United States

Chicago, Ill.—Officials of the International Harvester Company announced that it has resumed active operation in all its Canadian and United States plants. Several hundred men are back at work at wages ranging from 10 to 20 per cent. over the former rates.

Security rights, the officers said, will be observed in the re-employment and married men will be given preference. The new schedule for most plants increasing the work to four days will affect approximately 20 plants.

W. N. U. 1915

Statistics Indicate Present Year Healthy

Cumulative Death Rate Both In U.S. and Canada 9.1 Per 1,000

Toronto, Ont.—The year 1931 has been an exceptionally good health year, according to life insurance statistics, the cumulative death rate both in Canada and the United States being 9.1 per 1,000. This is approximately one per cent. in excess of that of 1930, when the minimum rate for all time was recorded.

Mortality for heart disease is two per cent. higher than in 1930. Tuberculosis is establishing a new minimum mortality record for the time, registering only 77 per 100,000 for the ten months, a decrease of 9.9 per cent. in the period for one year. Diphtheria death rate has declined 34.6 per cent. this year, a new low record. On the other hand, the cumulative rate for diabetes is considerably higher. The rate for cancer has also increased five per cent.

National War Memorial

Impressive Monument 90 Feet High To Be Erected At Ottawa

Ottawa, Ont.—Canada's national war memorial at Ottawa, which will be one of the most beautiful and impressive of its kind, is expected to be completed early next summer. Rapid progress is being made on the memorial, it is stated in reports from England, by the sculptors, the Marsh Brothers and Sisters.

The nearly feet high, showing a colossal group of figures in bronze, expressing the heroism and self-sacrifice of the Canadian people, the memorial, it is stated in reports from England, by the sculptors, the Marsh Brothers and Sisters.

The memorial will stand on the corner of the city post office, the terminal, and a new arrangement of uptown vehicular traffic.

Resigns Judicial Post

Mrs. Emily Murphy Gives Up Position In Edmonton

Edmonton, Alberta.—The first woman to be appointed to such a post in the Northwest Territories, Mrs. Emily Murphy, who has held office here for 15 years, has resigned as women's judge of the court of appeal at Edmonton. She also vacates the post of justice of the peace for this city.

While resigning as an active police magistrate for the city, Mrs. Murphy will continue to hold her appointment as a police magistrate and judge of the juvenile court for the province of Alberta.

The retiring magistrate, widely known as "Jenny Canuck" played an active part in the fight to have women recognized as eligible for appointment to the Canadian Senate.

Empire Central Bank

Clearing House For All Banks Of Empire Is Urged

London, Eng.—Creation of an Empire central bank to act as a clearing house for all central banks of the Empire is the chief recommendation of the report of the joint committee appointed to investigate the needs of British industries and the Empire Economic Union.

The report further suggests summing up of an Empire currency conference which might be able to establish a "pax-Britannica," built up out of the present anarchy of the world's monetary affairs.

Relief For Stricken Areas

103 Car Loads Of Fruit and Vegetables Contributed By Five Provinces

Toronto, Ont.—Five provinces have contributed a total of 103 car loads of fruit and vegetables to meet needs of people in stricken areas of southern Saskatchewan and part of southern Alberta. The cars have been despatched under the auspices of the Emergency Relief Committee of the United Church of Canada.

The largest number—68 cars—have been sent from Ontario. Central Alberta has contributed 15 carloads, mostly of mixed vegetables to aid destitute people in the southern part of that province. Manitoba has sent five carloads of mixed vegetables, while from British Columbia 13 carloads of fruit have been shipped. Northern Saskatchewan has sent two carloads of grain products to the affected areas.

Each car is being distributed among 300 families, it is estimated.

Will Load Grain

Montreal.—Seventy-four steamers are scheduled to load grain in Montreal before the close of navigation. Some 40 of the total are regular passenger and freight liners that will sail with part-cargoes of grain. The balance being tramp steamers.

"RED" SECRETS ARE BARED BY POLICE OFFICER

Toronto, Ont.—For seven long years, a shabbily-dressed, stocky-built German-Canadian, acting as secretary of the Regina, Sask., branch of the Communist Party of Canada. For those seven years he shared the innermost secrets of the "legal" and "illegal" branches of the party, sat at the council sessions, attended conventions, talked and corresponded with the leaders.

But this time, he had changed the ragged hand-me-downs for the scarlet and blue of the Royal Canadian Mounted Police. It was the first time in 10 years, his comrades said, that he had worn the proud uniform of Canada's famous force.

His name was Sergeant John Leopold, of the Royal Canadian Mounted Police.

For seven years he had been secretary of the Regina branch of the Communist Party.

He had won the post through hard work.

While a member of the party he was known, not as Sergeant Leopold, but as E. W. Eschewan.

He had entered the Communist Party in search of evidence to prove that it was an unlawful association, and that members of the party were parties to a seditious conspiracy.

The Communist Party in Canada, he testified, was a direct descendant of the Communist International since its formation. It had been represented at all congresses of the international.

From 1921 to 1924 it was known as "The Workers." But, he said, there were two parties. One was the workers, which was intended to be legal. The second was the "illegal" or underground party.

The parties were known as "A" and "Z" parties respectively. "Z" was the latter party which "carried on the illegal work of Communist International."

But in 1924, the "Z" party, at the direction of the executive committee of the Communist International, came into the open, the witness declared. Then the workers became known as the Communist Party in Canada, E. W. Eschewan testified.

While the "Z" party continued the work underground, it would not make that progress among the masses which was required "for the completion of its program."

Every member who joined the party, Leopold continued, took a definite pledge to subordinate himself to the decisions and directions of the Communist International at Moscow, and the Communist Party of Canada was controlled by the Moscow body.

This was shown, he claimed, in the constitution of the Canadian party, and also in the constitution of the Communist (Communist International) party.

He outlined the work of the nucleus, the "foundation of the party." This nucleus, he said, was composed of two or more members of the party in every mine, shop, store, lumber camp, shipyard, factory or other industrial concern, and operated secretly. The members of the nucleus were known to each other but not to the factory workers in general.

The main purpose of the party, he testified, was "to stir up discontent and strife; to foment and develop the revolutionary spirit."

THE "OBSERVER" LEAVES FAIRLY WITH LORD READING

Montreal.—The export of ships at sea will cease their tour on Remembrance Day in tribute to those who died in the war. Headquarters of Canadian Pacific and Canadian National Steamships announced that instructions had been given for ships for the morning of November 11 unless the sea is rough.

BRITISH STATESMAN

People Doing Everything Possible For Needy On Prairie

Edmonton, Alberta.—Eastern Canadians are making a response to the need of stricken areas in the west that is "nothing less than remarkable," in every way immensely gratifying," states Rev. Dr. M. H. Wilson, superintendent of missions for the United Church in northern Alberta, who has returned from a meeting in Toronto of the home mission board.

Conditions in northern Saskatchewan, parts of northern Manitoba, and certain dried-out sections of southern Alberta have been put before the people of Ontario in particular, with the result that, besides many carloads of vegetables and fruit for points in Saskatchewan, some 50 tons of second-hand clothing have been contributed through United Church congregations and sent west for distribution in the three prairie provinces. This work is continuing.

It is not practically all the United Church missionaries are doing for the winter. By way of meeting the particular needs of the coming winter, two United Church missionaries-at-large have been sent into northern Saskatchewan to minister to the large numbers of the poor who have moved into that area from the south, and three men have been similarly assigned to work among relief camps in various parts of the country.

The department is inaugurating a new policy to encourage livestock production in the west. The sale of the prairie where there is sufficient water to make cattle raising feasible. The department will furnish certified high grade grain and straw and sufficient for up to 25 acres on each farm to give farmers in each municipality.

The seed returned must be free of weed seed and by this means it is expected an abundance of certified seed will be available in a few years all over the west. This is considered an important step in encouraging livestock raising.

One of the great difficulties in connection with changing into mixed farming has been the cost of buying high grade seed. The movement has prevented many farmers this year from stocking their farms.

Work For Train Crews

Enlarged Movement Of Grain Increases Employment On Railways

Calgary, Alberta.—Both Canadian National and Canadian Pacific Railways east and west have endeavored to increase their train and engine crews in the past few weeks, it was announced here. The movement was reported to be considerably heavier than during the corresponding period last year.

Calgary office of the Canadian Pacific Railway stated that eight more train and engine crews than were required at this time last year were employed in the last few days to handle the freight service out of Calgary. A corresponding increase was announced by the Canadian National Railway, which stated that the movement was much above this period in 1930. The movement of grain just east of Calgary and Edmonton was estimated to have doubled in the last week.

Winter pasture to let—Guy Voisey phone 204.

Mrs. E. B. Bastin and Miss Molly spent the week end in Calgary.

Mr. and Mrs. Levi Ayotte and Richard left on Saturday for Long Beach, California.

Mrs. Ed. Latiff was a tea hostess on Saturday in honor of Mrs. H. J. Friesen of Vulean.

Mrs. John Matlock left on Saturday for Calgary where she will remain for some time.

Born—To Mr. and Mrs. Owen McCumber, on Sunday, November 8, a daughter, at the home of Mrs. Irvin Fisher.

Theodore and Agnes Holm and Glenn and Mabel Reicher returned on Tuesday from Calgary where they have been visiting.

Mrs. N. H. Heal and Mrs. G. L. Dupue were dinner hostesses on Sunday for Mr. and Mrs. A. M. Watt who leave shortly for an extensive holiday.

Mr. and Mrs. G. Fath motor-ed to Calgary on Sunday to bring their daughter Tila home from the Holy Cross hospital where she was operated on for appendicitis.

Messrs. J. W. Brown, Art Hopkins, Frank Reicher, and Walter Reicher all went hunting geese on Tuesday at Lake Keho. They saw plenty of geese but couldn't get in range.

The C.W.L. wish to thank those who so generously supported the chicken supper on Saturday, Nov. 7th. The capacity of the workers was reached in supplying the demands of the large crowd.

Snow on Saturday night, lasting until Sunday afternoon melted almost as it fell, and for a time resulted in slick roads where there was no gravel. The moisture precipitation was not large.

K. R. McLean, R.O., of McLean & Anerson, Sigh Specialist, 224 8th Ave West, Calgary will make his monthly visit to Champion, Friday, October 2, at the Drug Store.

After last year's experience, with freeze-up practically occurring early in October, the performance of the weather man this year is eminently satisfactory. Well into the month of November we are still enjoying splendid fall weather, with just enough frost at times to keep the situation reasonable.

Heads Grow Larger

A London West End hatter states that hats have been demanded larger in size during recent years. He was unable to explain the phenomenon. If anyone had asked for size 7 1/2 a few years ago it would have been a special order. But today the big head is quite normal, and it is necessary to have size 7 1/2 in every style of hat ready made on the shelves.

Mrs. Frank Starr is Serinusly ill

Mrs. Frank Starr was taken seriously ill during the first of the week and for some days her condition caused considerable anxiety. She has made considerable improvement, however, and is practically out of danger. Mr. and Mrs. Fred Starr and Mrs. R. I. Starr of Browning, Montana, have been here for several days.

Chicken Supper Saturday, Nov. 21

The Ladies' Aid annual chicken pie supper will be held in the Community Hall Sat. Nov. 21st from 5 to 8 o'clock. Novelty fancy articles and candy tables also home produce. Adults 50c Children under 12, 25c.

The C.W.L. chicken supper on Saturday, Nov. 7th, was very successful from every point of view. The attendance was unusually large, the efforts of those providing the supper being taxed to the utmost during the entire period the chicken was served. Other attractions were well patronized and altogether a splendid evening was spent. The C.W.L. are to be congratulated on the outstanding success achieved.

When coming to the Alton Community dance on Nov. 20th don't forget that you will meet one of the most famous old time violin players in southern Alberta in the person of Mr. Tomie Platt who drew the red ticket at High River contest. Come yea and hear him for 75c per couple and supper included.

Bread For Sale

BREAD! BREAD!

Don't poll your EATS with poor Bread. You raise good wheat—its made into good Flour which gives us a chance to make good Bread. WE USE VULCAN FLOUR because its made from your wheat and because we find it exceeds all others for flavor and food value. That's what you want—that's what we aim to give you, and at the right price.

5 Cents per Loaf!

for one loaf or a hundred. We retail Bread and Flour at Wholesale Prices. This don't please a few but it sure pleases many.

We thank you for your liberal encouragement since we came here —two years ago—when the same sized loaf of Bread was selling at 12c per loaf, or 2 for 25c. Same difference, we would say.

Think This Over. 'Nuff said. Respectfully,
COATES & HANCOCK

STAY WITH THE WHEAT POOL

In commenting on the delivery of wheat to Pool elevators in the prairie provinces, The Northwestern Miller, never very friendly to the Pool movement, says: "There is reason to believe that all three Pools have up to the present enjoyed their usual quota of grain handlings in the country. Such conditions in a year of short crops and keen country buying bespeaks the loyalty of the western farmer to the organization he has built up."

The solidity of purpose manifested by the grain growers of the west brings gratifying praise even from opponents. Do not let up for a minute.

See that All Your Grain goes to Alberta Pool elevators.

You can pool your wheat or sell for cash at current market prices.
